

Risk Assessment Principles & Practice

1-Day Programme

Introduction:

Risk Assessment is the main element of The Management of Health and Safety regulations (1999), and forms the backbone of most legislation introduced recently.

This programme is devised to introduce the principles of risk assessment techniques and is ideal for those responsible for carrying out risk assessments in compliance with management of Health and Safety regulations (1999).

Who should attend?

- Managers
- Supervisors
- Team leaders
- All safety professionals & representatives
- Occupational health professionals
- Human resources professionals

Programme Objectives:

- To understand risk assessment techniques in compliance with the Management of Health and Safety at Work Act and recent legislation.
- To identify action to be taken to comply with the regulations.
- To carry out risk assessments within the work area.
- To compile an action plan to reduce risks within the work area.

Programme Benefits:

- Identify actions, which need to be taken within the workplace to comply with the regulations.
- Carry out systematic risk assessments within your own organisation.

Programme Overview:

- Overview of legislation applicable to risk assessment.
- Management of Health and Safety at Work regulations.
- Case study – 'Hazard Identification'
- Practical risk assessment
- Controlling risks

This course can be run exclusively and tailored to suit your company's specific learning requirements and organisational needs. Costs are dependent on number of days required and bespoke content
